

TWELFTH INTERNATIONAL CONFERENCE INVERSE PROBLEMS: MODELING & SIMULATION

MAY 31 - JUNE 06, 2026 - MALTA

<http://www.ipms-conference.org>

The main sponsor of the Conference is The Eurasian Association on Inverse Problems (<http://www.eurasianip.org/>).

The conference is also supported by American Institute of Mathematical Sciences (AIMS) and the leading international journals Inverse Problems, Journal of Inverse and Ill-Posed Problems, and Inverse Problems and Imaging.

International Program Committee: Giovanni S. Alberti, Italy; Simon Arridge, UK; Jin Cheng, China; Alemdar Hasanov Hasanoğlu (Chair), Türkiye; Thorsten Hohage (Co-Chair), Germany; Hiromichi Itou, Japan; Sergey I. Kabanikhin, Russia; Barbara Kaltenbacher, Austria; Leonid Kunyansky (Co-Chair), USA; Antonino Morassi, Italy; Roman Novikov (Co-Chair), France; Eric Todd Quinto, USA; Mikko Salo, Finland; Otmar Scherzer, Austria; Cristiana Sebu (Co-Chair), Malta

International Organizing Committee: Onur Baysal (Co-Chair), Malta; Karel Van Bockstal, Belgium; Alexandre Jollivet, France; Burhan Pektaş, Türkiye; Cristiana Sebu (Chair), Malta; Ye Zhang, China

Plenary Speakers: Dr. Guanghui Hu (School of Mathematical Sciences, Nankai University, P.R. China); Dr. José A. Iglesias (University of Twente, The Netherlands); Prof. Venky Krishnan (Centre for Applicable Mathematics (CAM) at Bengaluru, India); Dr. Ekaterina Sherina (Faculty of Mathematics, University of Vienna, Austria)

Announced Minisymposiums: **M1.** Recent Advances in Inverse Scattering and Tomography *The mini-symposium is dedicated to the anniversary of an outstanding expert in inverse problems, Professor Roman Novikov, École polytechnique, France;* **M2.** Inverse Problems in Hybrid Imaging Modalities; **M3.** Inverse and Control Problems in Vibrating Structures: Theory, Applications and Computational Aspects; **M4.** New Trends in Regularization Theory; **M5.** Inverse Problems with Data-Driven Methods and Deep Learning; **M6.** Inverse Problem Theory for Innovation of Detection Methods; **M7.** Applied Inverse Problems and Partial Differential Equations; **M8.** Selected Topics of Inverse Problems; **M9.** Inverse Problems Under Poisson Noise; **M10.** Inverse Problems for Fractional Equations; Poster Session
